

Sales Performance & Customer Behaviour Dashboard

Analysis Summary & Key Findings

1. Which region contributed the highest total sales?

The **West region** contributed the highest total sales at **\$0.73M**, followed by the East (\$0.68M), Central (\$0.50M), and South (\$0.39M).

Key Insight: The West region was the largest contributor to overall sales during the analyzed period.

2. What is the trend of monthly sales over the last two years?

Monthly sales show a **recurring seasonal pattern** across both years. Sales generally decline between **February and April**, followed by a strong increase that peaks around **September–October**. Sales then decline toward the end of the year.

The current year's sales were slightly higher than the previous year's during the peak months.

Key Insight: The repeated pattern suggests noticeable seasonality in sales performance, with September–October representing the strongest sales period.

3. Who are the top 5 customers based on revenue?

Rank	Customer	Total Sales
1	Sean Miller	\$25,043.05
2	Tamara Chand	\$19,052.22
3	Raymond Buch	\$15,117.34
4	Tom Ashbrook	\$14,595.62
5	Adrian Barton	\$14,473.57

Key Insight: Sean Miller generated the highest sales among the top five customers, with total sales of **\$25,043.05**.

4. Which product category has the highest profit margin?

The **Technology** category recorded the highest profit margin at **17.40%**, followed by Office Supplies at **17.04%**. Furniture had a considerably lower profit margin of **2.49%**.

Key Insight: Technology and Office Supplies generated substantially higher profit margins than Furniture.

5. What percentage of the sales target was achieved?

Overall sales reached **184.22% of the target** during the analyzed period.

For the most recent quarter shown in the dashboard (**September–December**), sales achievement increased to **210.24% of the target**.

Key Insight: Actual sales exceeded the defined target during both the overall period and the most recent quarter.

6. During which months did sales drop significantly?

Two noticeable declines can be observed in the sales trend:

- **March → April**
- **After the September–October peak → November**

Sales showed a slight recovery toward the end of the year.

Key Insight: The largest fluctuations occurred around the seasonal low in March–April and following the September–October sales peak.

7. Which customer segment has the highest profit margin?

Customer Segment	Profit Margin
Home Office	14.03%
Corporate	13.03%
Consumer	11.55%

The **Home Office** segment recorded the highest profit margin at **14.03%**, followed by Corporate at 13.03% and Consumer at 11.55%.

Key Insight: Home Office customers generated the highest profit margin among the three customer segments.

Overall Dashboard Insights

The analysis highlights several important patterns in the business data:

- **West** was the largest contributor to total sales.
- Sales demonstrated a **recurring seasonal pattern**, with the strongest performance around September–October.
- **Technology** had the highest profit margin among product categories.
- **Home Office** had the highest profit margin among customer segments.
- Overall sales exceeded the defined target, reaching **184.22% achievement**.
- A small group of customers contributed significant sales, with **Sean Miller** ranking highest among the top five customers.

Business Recommendations

Based on the analysis, the following actions could be considered:

1. Focus on high-performing regions

The **West region** generated the highest total sales. The business could examine the factors contributing to its performance and consider whether successful sales strategies from this region can be applied to other regions.

2. Prepare for seasonal sales patterns

Sales consistently increase around **September–October** and decline during certain months. The business could plan inventory, promotions, and marketing activities around these seasonal patterns to better manage demand.

3. Prioritize high-margin categories

Technology and **Office Supplies** showed considerably higher profit margins than Furniture. The business could analyze these categories further and explore opportunities to increase sales while maintaining healthy margins.

4. Improve Furniture profitability

Furniture recorded a much lower profit margin (**2.49%**) compared with Technology and Office Supplies. The business could investigate pricing, discounts, product costs, and product-level profitability to identify possible reasons for the lower margin.

5. Strengthen relationships with high-value customers

The top customers contribute significant sales. The business could consider customer-retention strategies such as personalized offers, loyalty programs, or targeted communication for high-value customers.

6. Analyze the Home Office segment

The **Home Office** segment had the highest profit margin at **14.03%**. Further analysis of the products and purchasing patterns within this segment could help identify opportunities for profitable growth.

7. Monitor target achievement

Sales exceeded the defined target considerably, reaching **184.22% overall** and **210.24% during the most recent quarter shown**. Management could review the assumptions behind the targets and use historical performance and seasonal trends when setting future targets.
